ASBESTOS MANAGEMENT

Asbestos is a family of fibrous silicate minerals. This material has a general tendency to break up into fine mineral fibers.

Non-airborne asbestos is not a health problem.

Air-borne asbestos inhaled into lungs can cause life threatening illnesses.

NEWCOMER'S ENVIRONMENTAL BRIEFING US ARMY GARRISON KAISERSLAUTERN

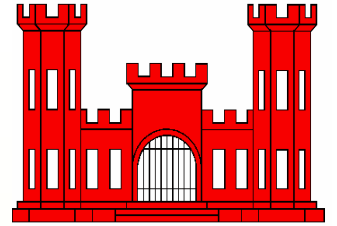

ASBESTOS MANAGEMENT

- USAG Kaiserslautern has a proactive Asbestos Management Program
- Designated Asbestos Manager/Coordinator
- All buildings within the garrison have been surveyed
- EMO maintains a database with location of all asbestos containing material.

NEWCOMER'S ENVIRONMENTAL BRIEFING US ARMY GARRISON KAISERSLAUTERN

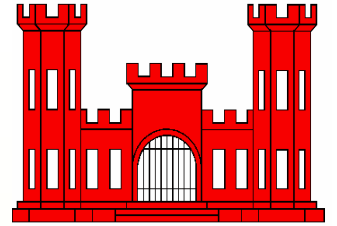

ASBESTOS MANAGEMENT

CONTACT THE ASBESTOS MANAGER AT EMO:

- If you find friable Asbestos (powder, dust, etc.)
- Prior drilling, disturbing or making renovations to a building component
- If you suspect any material of containing asbestos
- If you have any questions concerning asbestos
